based and environmental industries (Lantra), food and drink manufacturing (Improve Ltd), tourism and hospitality (People 1st Cymru) and retail (Skillsmart Retail) have undertaken extensive research by carrying out a survey of over 3,000 employers across the Welsh food and drink supply chain. The research, now being finalised, has provided the project with a better understanding of what training skills developments are needed over the next decade.

During the week businesses and individuals are invited to visit the Lantra building situated on the showground to discuss with the team some of the key findings and recommendations from the survey to date. There will also be an opportunity for tea and coffee and to find out more about Lantra Wales and what it has to offer in Wales.
